The Best Preparation for good work tomorrow is to do good work today.— Elbert Hubbard

Transition Classrooms

The Auglaize County Transition Classrooms is located in the Auglaize County ESC Annex. The Transition Classrooms serve students ages 18 through 21 years of age with Multiple Disabilities. The goal is to teach students how to function as independently as possible. The class follows a community based functional curriculum to help students develop the vocational, daily living, and recreation skills they will need to be independent adults. Job Specialists provide vocational experiences through local business partnerships. The Intervention Specialists work with families and supporting agencies to create a support network to assist in life after public school
